Profile

I've been creating videos for 15 years and am currently a UX designer at the beginning of his journey.
Although I'm only at the beginning stages as a UX designer, I see lots of connecting dots between the two worlds, Between these dots I have a lot of knowledge, experience and ability.
And that's the added value I bring with me In each project - I live and create in a visual world and know how to tell a story. I know how to turn a dream, an idea or a vision into a tangible and existing result.
And I know how to lead a project, and bring a general idea to work...

Education

2021

Work Experience

2021 - present

UX Designer & Video Creator
Freelance

I've been creating videos for 15 years and am currently a UX designer at the beginning of his journey.

2014 - 2021

Video Creator
Freelance

In my past experience, I have directed, produced, photographed and edited hundreds of projects, for dozens of clients.
Since 2014, I have been working regularly with the video production studio at the Prime Minister's Office.

2014 - 2019

Head of Video Dep.
Albatross Aerial Photography

As part of my role, I was responsible for all the video content produced by the company for clients: I directed, produced, photographed and edited hundreds of videos and films during the time I worked for the company. I recruited professional candidates and managed production teams. I managed the productions directly with the largest companies in the industry, government offices, TV channels and production companies in Israel and around the world.

2012 - 2014

Technical Director
Jumpcut - School for Editors & Animators

at the leading editing school in Israel - "Jumpcut". Responsible for the day-to-day technical operation of the school and providing technical and technological solutions for teachers and students.
